The needs of the analytical chemist are well supplied. He has access to a whole library of well-written and well-authenticated text books on every department of chemical knowledge, and it would be mere presumption to offer any substitute for the recognised standard works of reference. There exists, however, a want which this volume is designed to meet. The general users and merchants of chemicals and drysalteries are not, as a rule, versed in chemical analysis, nor are the exigencies of their business such as to demand the inclusion of a trained chemist among the members of their staff; but there are many occasions when, in buying articles of a chemical nature, it would often be very helpful - and very profitable - to be able to form an opinion as to the relative values of, say, half a dozen samples of the same class of material. For instance, a certain large manufacturer had for many years been purchasing the lubricating oil used in his very extensive works upon the guidance of a rough and ready test - he filled a jar with the oil, and ascertained the specific gravity by means of an antiquated hydrometer. The denser the oil, the higher it rose in his estimation, and he placed...
