On the beach about 2 miles south of San Simeon chromite in small chunks and boulders can be observed at low tide. The quality is said to be inferior. Rancho Santa Rita, 8 miles northeast of Cayucos, chromite of good quality occurs in surface ore and some of it was shipped between 1880 and 1890, but no work is now going on. T. Steele, Rancho Santa Manuela, Arroyo Grande. A deposit of a good grade of massive chromite is found on this property about 6 miles northeast of Arroyo Grande on the creek of the same name. James Wheeler and associates of Santa Margarita have recently located a number of claims for copper and chromite along the summit of the Santa Lucia Range, extending for about 2 miles along the ridge and at...
