Dura slightly younger than the above. No seed grains developed. Contained 014 per cent. HCX. The investigation of cyanogenesis in all the fodder plants used in the Sudan and in certain of the leguminosae, is a piece of research a chemist might carry out with advantage. 49 General Routine Work Tup: nature of this work may be classed under two main headings: 1. Pathological; 2. Chemical. It bulked so largely that little time was afforded for original investigations, but then again some of it was really more or less research work; and in any case the mere fact that so much had to be done thus early in the laboratories career, seems to show that they have filled a felt want. Under each of the above headings is placed a list of the examinations and analyses performed. 1. Pathological Nature...
