

The Laws of Radiation and Absorption: Memoirs by Prevost, Stewart, Kirchhoff, and Bunsen, and Kirchhoff and Bunsen (Classic Reprint) (Paperback)

Filesize: 5.42 MB

Reviews

Good electronic book and valuable one. It generally is not going to charge an excessive amount of. Its been developed in an remarkably straightforward way and is particularly simply following i finished reading this ebook through which really transformed me, change the way i think.
(Mr. Domenic Eichmann)

THE LAWS OF RADIATION AND ABSORPTION: MEMOIRS BY PREVOST, STEWART, KIRCHHOFF, AND KIRCHHOFF AND BUNSEN (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Laws of Radiation and Absorption: Memoirs by Prevost, Stewart, Kirchhoff, and Kirchhoff and Bunsen The attempt of Prevost to explain the experiments of Pictet, of the apparent concentration of cold at the focus of a mirror, without attributing the quality of radiation to cold, as assumed by Pictet, lead him to the enunciation of the very important principle which he called the movable equilibrium of heat, now designated as the theory of exchanges. Prevost, who was a disciple of le Sage, and who had issued, with many additions, his memoirs, assumed, in addition to a corpuscular fluid caloric, a free corpuscular radiant caloric, the equal interchange of which between neighboring free spaces, constituted heat equilibrium. Any interference with this equilibrium will be reestablished by the inequalities of the exchanges. On this principle he was able to explain the apparent concentration of cold and also to show the inadmissibility of cold as an agent susceptible of radiation. He was careful, however, to fortify his principle by showing that the same results would follow on the then distrusted hypothesis of undulatory exchanges, which has been adopted by his successors. Later experimenters, particularly Leslie and De la Provastaye and Desains, confirmed the theory and also showed in many instances quantitative relations between radiation and absorption. But the most important advance was made by Balfour Stewart in establishing, not only a quantitative relation, but also a qualitative or selective one. By the introduction of his ingenious idea of an impervious radiating inclosure he demonstrated the equality between the emissive and the absorptive power of any wave length. We owe to Kirchhoff, however, the first rigorous proof of the...
